

Multi-Tracking Assignment

It is very popular to see on youtube.com people singing all of the parts to a song at the same time. They use recording software and video editing in order to achieve this effect. This assignment will help you learn how to create the audio recording of one of those videos.

Similar to the music notation assignment, you will use a music recording software to record yourself harmonizing with yourself on a song. You must have three or more harmonies on your song. This can be on a song that we are doing in class or a song of your choice. You may partner up with someone in order to do Soprano/Alto/Tenor/Bass parts for SATB music. You may sing to accompaniment but a cappella is preferred.

There is a free software program called Audacity - <http://audacity.sourceforge.net/>

Audacity has all the features you need in order to complete this assignment.

If you have another program such as Garageband, Logic or Pro-tools you may use them.

You will turn this assignment as an .mp3 file as well as whatever file your computer saves your original file in. For example, Audacity files are .aud. Please turn it in to Edmodo.
